

# ZERUBABEL SOLOMON

## CURRICULUM VITAE

September 11, 1994

Ethiopian

### CONTACTS

- 0920588447/ 0940368134
- zeresh.solo@gmail.com
- Addis Ababa, Ethiopia

### SKILLS

- Creativity
- Team Working
- Problem Solving
- Interpersonal
- Time Management

### LANGUAGE

	Reading	Speaking	Writing
Amharic	Native	Native	Native
English	Fluent	Fluent	Fluent

### SOFTWARE SKILLS

### ACHIEVEMENTS

Verified Enterprise Design Thinking Practitioner by IBM

### STATEMENT

A highly organized, dedicated and efficient individual who strongly believes in the power of holistically good ideas paired with a multidisciplinary, research based and collaborative design process.

### EDUCATIONAL BACKGROUND

B.Sc in Architecture & Urban Planning from University of Gondar in February, 2018 with a distinction **C.GPA of 3.36**

### Work Experience

From **AUGUST of 2018 to 2020**, i was working in Segedu consulting Architects as a project architect. During my stay there, i've designed and participated in many projects of varying scopes. To name a few:-

- Yeka Woreda Level park development project  
(Participated on the conceptual design stage as well as final visualizations)
- Addis Fana Trade & Comm. B+G+4 Building  
(Designed the whole scheme as well as did the drafting and 3D visualizations)
- Tigray Water Works Head Quarter Building  
(Participated on the preliminary design and 3D visualizations)
- Ethiopian Airlines Drive-Through car wash  
(Designed the whole structure, drafted and also did the 3D visualizations)
- Future Hopes I.D B+G+4 Mixed use building  
(Designed the whole edifice, drafted and also did the 3D visualizations)
- The First Bouldering Center In Ethiopia  
(Designed the whole edifice, drafted and also did the 3D visualizations)
- **These and the rest are compiled in my portfolio which is attached to this CV**

### Internship

From September 2015-January 2016 i was doing my internship in YTH Consultancy. During my stay there, i was exposed to large scope projects such as A.A University kality campus's master plan design

Ref. No Re 126/12/2021  
Date: 10/12/2021

To Whom It May Concern

This is to certify that Ato Zerubabel Solomon is working in our Firm in a position of Architect since December 2020 GC. He is creative and dependable professional.

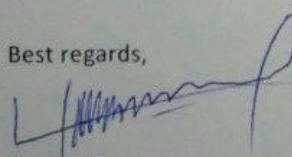

Ato Zerubabel Solomon has participated in different projects of varying scale from single family houses to large building complexes.

The followings are some of the projects he has accomplished in our Firm.

1. B+G+6 Mixed Use Apartment building for Addis Bleaching Manufacturing P.L.C at Gergi in Addis Ababa.
2. 2B+G+5 4 Star Hotel building for Elgel Hotel and SPA at Mekanissa in Addis Ababa.
3. B+G+4 Guest House building for W/ro Elsa Mengiste in Gondar.
4. G+5 Mixed Use building for Ato Nabil Ibrahim architectural and interior design at Meskel Flower in Addis Ababa.
5. G+4 Residential building for Aseffa Demesse at Wossen in Addis Ababa.
6. Residential buildings of different scale.

Ato Zerubabel Solomon is still working in our Firm. He is earning a monthly basic salary of Birr 8,005.68 (Eight Thousand Five and Sixty-Eight Cents) and transport allowance Birr 2,001.42 (Two Thousand One and Forty-Two Cents). Income tax has been collected from his salary and remitted to the Respective Authority every month.

Best regards,

Resume

Selected Works

This badge was issued to [Zerubabel Solomon](#) on 1 August 2020.

Type: Learning

Level: Foundational

Time: Hours

Cost: Free

## Enterprise Design Thinking Practitioner

Issued by [IBM](#)

The earner has acquired knowledge of applying Enterprise Design Thinking and its value. As a Practitioner, the badge earner finds opportunities to try it out in their every day work.

### Skills

- [Design](#)
- [Empathy](#)
- [Experience Design](#)
- [Ideation](#)
- [User-Centered Design](#)
- [User-Centric](#)
- [User Experience](#)
- [User Research](#)
- [UX](#)

### Earning Criteria

- » Able to discuss and apply basic Enterprise Design Thinking concepts.
- » Able to identify opportunities to apply Enterprise Design Thinking.

### Standards

#### [Enterprise Design Thinking](#)

Enterprise Design Thinking is IBM's approach to applying design thinking at the speed & scale a modern enterprise demands. It helps our teams not only form intent, but deliver outcomes - outcomes that advance the state of the art and improve the lives of the people they serve.

### Evidence

#### Enterprise Design Thinking, Practitioner

This person has completed the Enterprise Design Thinking Practitioner Online Education Program. Their achievement was validated by IBM Design Global through course completion and real-world application, and against the criteria set by the Enterprise Design Thinking Center of Competence.

# ADDIS FANA TRADE AND COMMODITIES B+G+4 MIXED USE BUILDING

It is a mixed use building to actually be constructed in the city of Nekemte. I designed and drafted the whole scheme. For the conceptual approach i thought about interfusing oromo cultural intitites into a modern edifice, that is what can be boldly seen on the 3d.

Basement floor plan

Ground floor plan

First floor plan

2nd and 4th floor plan

Third floor plan

# SOLOMON MIXED USE BUILDING

For this mixed use building design, I wanted to portray a clear zonal and visual segregation between the office spaces and the commercial ones, the offices get a cozy atmosphere with filtered light and air controlled by the perforated facade. The commercial spaces are well exposed to the pedestrian route. I tried to experiment with raw brick and concrete for the final touch.

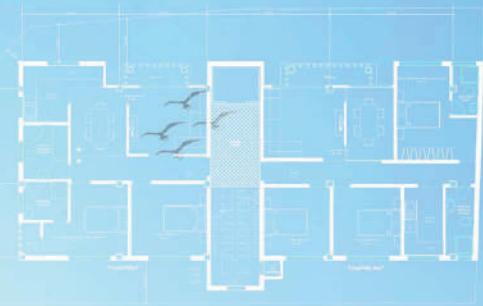

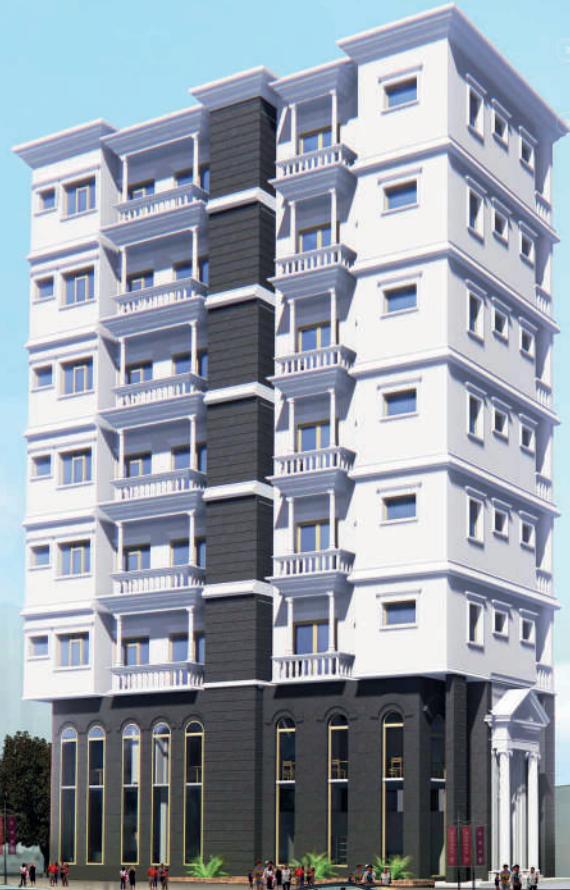

# WORLD VISION ETHIOPIA OFFICE BUILDING PROPOSAL

For this office complex, my approach was to squish the total height of the building into volumes thus making a G+5 building resemble a G+2. A Tango of volumes inside a rectangular frame which creates a visual balance and creates a boundary for the volumes to play within. The facade i used also mimics the layout of the bricks and filters the light to the office space.

# APARTMENT DESIGN(CLASSICAL STYLE)

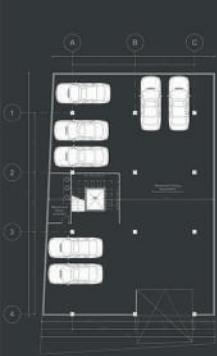

An apartment edifice that consists of Two and Three bedroom Units along with commercial units at the lower 2 stories. It rests on a plot area of 250sq.m and is designed with a classical theme. The stair well segregates the two and three bedroom units. The interior partitions are designed in such a way that each corner of the respected rooms get evenly lit. The supplementary spaces such as the slaughtering and the laundry are located in the basement along with the car parking.

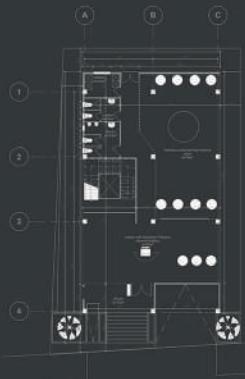

Space Layout of the Typical floors

## THE FIRST BOULDERING CENTER IN ETHIOPIA

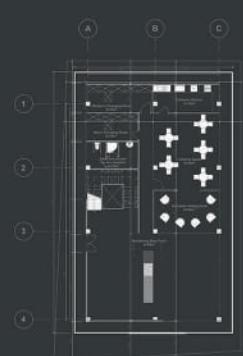

Bouldering is rock climbing stripped down to its raw essentials. Leaving behind ropes and harnesses and just using climbing shoes and a bag of chalk over safety mats. It is one of its kind indoor rock climbing center in Ethiopia that has also equipped Apartment and alternative sports in it. It is a B+G+7 edifice. Keeping into consideration the fact that it is the first in Ethiopia thought about introducing the crooked geometries of the bouldering walls to the outside and use them as a facade character thereby introducing the purpose of the building to an outsider. In the inside, I created larger open downs in the center & on the frontal part of the edifice for the bouldering walls to pass through and nourish the rest of the spaces.

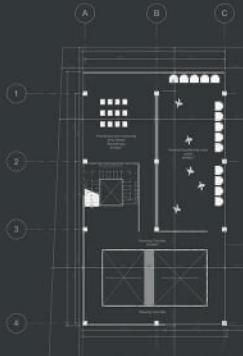

Basement Floor Plan

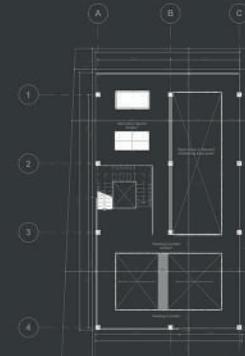

Ground Floor Plan

Mezzanine Floor One

Mezzanine Floor Two

Mezzanine Floor 3 and 4

Typical Apartment Floor

# AWASH INSURANCE COMPANY

This is a regional Awash insurance company office which rests on a plot area of 200sq.m. The project was designed with a concept that was taken from the purpose of the company which is to provide "shelter" for people's necessities. This was elaborated into a volumetric approach where a series of slender volumes are enclosed by a wholesome volume that appears to provide the purpose of shelter. The ground floor is dedicated to customer services while the upper floor is solely dedicated for managerial offices. The building is designed in such a way that harsh sun faces the solid slender volumes.

# THE FIRST AQUARIUM COMPLEX IN ETHIOPIA

The Aquarium rests on a total plot area of 1500sq.m. It is one of its kind Aquarium dedicated building in Ethiopia and resides in the beautiful City of Bahir Dar where the proximity and diversity of Aquatic habitat is perfect to Nurture and eventually exhibit them. There will also be Aquatic habitats from other countries. The conceptualization mainly hovers around exhibiting the purpose of the building to an outsider. And thus emphasizes on a simple and elegant facade design which resembles the flow of water. The facade is to be constructed out of Split plastic bottles along with ire mesh, which is also an experimentation that utilizes thrown materials. The inside of the building consists of multiple large multi story slender aquariums with a smooth access in between them that leads users on more like an exhibition center.

## DRIVE-THROUGH CAR WASH SHADE

A drive-thru/ Drive-through Car wash is a shade or a building where it is fitted with an automated car washing machine that washed car automatically thus limiting human labour to only machine control rooms. The user drives his car on neutral upon approaching the ramp, then the machine slowly pulls the car in and have it pass through a series of car washing processes ranging from dry washing, to soaking , to rinsing and finally drying. The owner of the shade is Ethiopian Airlines and it is to be constructed inside the compound of ET Airlines for use by the staff. It rests on 650sq.m plot area and consists of operating room, pump room and the actual washing chamber. The conceptualization stems from the logo of Et-Airlines which resembles a wing and the shade is inspired by the idea of creating dynamism.

Zerubabel Solomon

# COMMERCIAL BUILDING PROPOSAL

This is a simplified concept proposed for a commercial building to be built in the heart of Addis Ababa. The usual cliche way of designing commercial buildings is absent here. There is a clear volumetric and aesthetical segregation between the commercial spaces and the office spaces. The office spaces enclose and demarcate the commercial spaces in this scheme and the tango between the solid and the fragile volumes created a unique and simple composition. The commercial spaces have a clear visual contact with the street frontage while the office spaces have an obscurity that is brought about by a series of vertical louvers that filter the light that gets in.

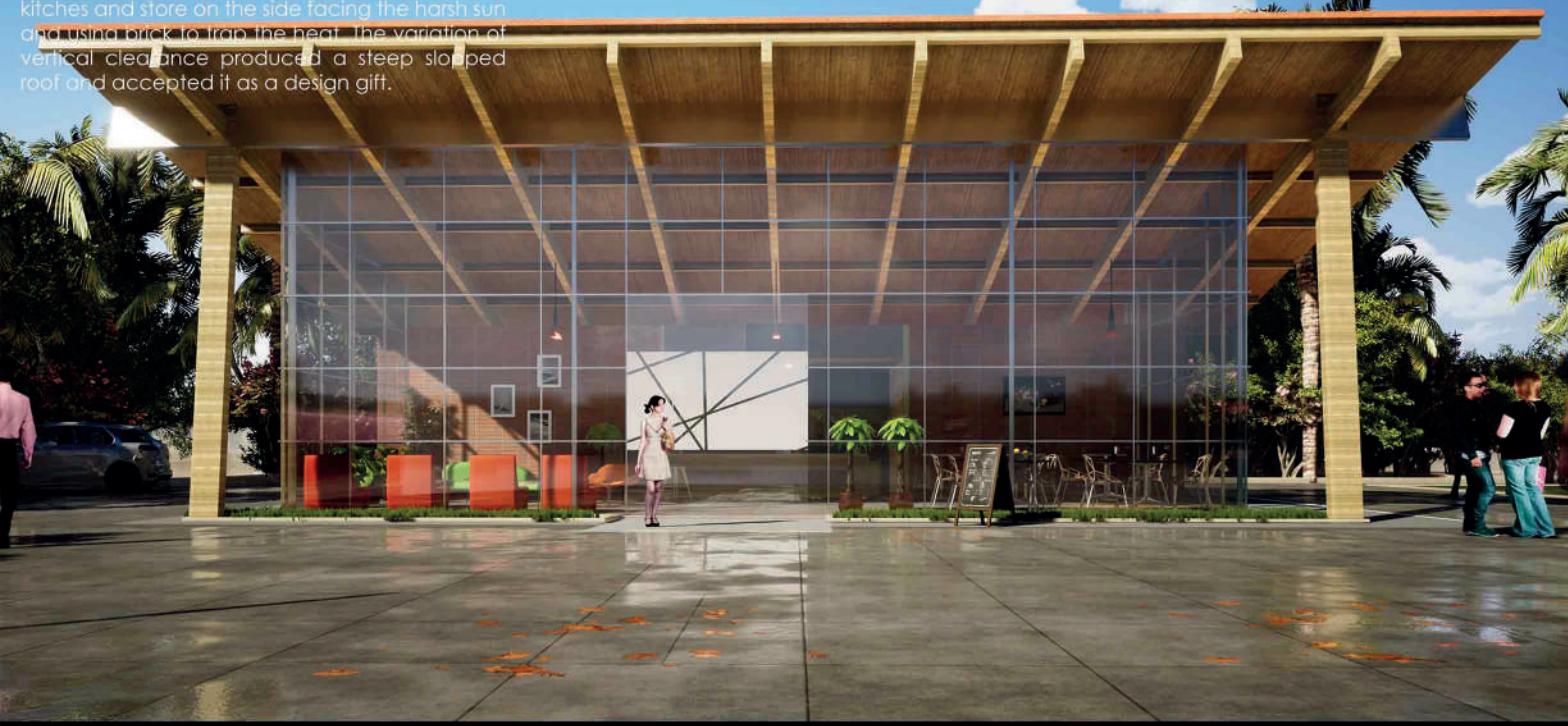

# ETHIOPIAN EVANGELICAL CHURCH ASSEMBLY BUILDING

The building rests on 800 sq.m of plot area, it mainly consists of offices. An assembly hall is also integrated in the design. For this design, I went with bold approach of visually composing- and segregating the office spaces from the assembly halls. A clear and bold composition of forms is observed here with the slender volumes being offices and the black volume consisting of small assembly offices. A shading device that goes in tone with the layout of the bricks is also integrated on the south-west facing face. It contributes to the filtering of light that is so desired in office spaces.

# STAFF LOUNGE PROPOSAL FOR AASTU

The lounge rests on a 250sq.m plot area and consists of Kitchen, cold and dry store and a serving area that accompanies 70 staff at a time. The conceptualization stems from the idea that the lounge must face the garden nearby and that it shall face away from harsh sun. Using this analogy I went with a bold approach of opening up the serving area of the lounge towards the garden by utilizing clear glass and placing the kitchens and store on the side facing the harsh sun and using brick to trap the heat. The variation of vertical clearance produced a steep sloped roof and accepted it as a design gift.

# GIRUM PEDIATRIC CLINIC

Pediatric clinic is a clinic dedicated to treating infants and children, so i was inspired by leggo toys for the formal composition of this design. Clear and visually segregated volumes. Volumes protruding away from each other, immersed on one another and paving a way for one another while doing so, just like a leggo toy structure.

# RESIDENTIAL BUILDING DESIGN SAMPLES

# YEKA WOREDA LEVEL PARK DEVELOPMENT PROJECT

This park project rested on a total area of 500 sq.m and it's a woreda level park meaning there will be a couple more replica of this design on other areas of the sub-city. My share in this project ranged from conceptualization to final design to modeling and post production. The theme of the park needed to resemble a rural compound. That's why we see many compositions here ranging from circle to oval to rectangle and spirals.

# HAWASSA INDUSTRY PARK EMPLOYEE RESIDENCE MASTER PLAN

Hawassa industry park wanted to propose a housing project for most of its workers and the firm i worked at won the competition for the master plan design. Luckily enough i participated in most of the core works ranging from concept synthesis to landscape design and finally 3D development, all while preparing study models to test how the whole scheme would fit into the context. The total area of the site is a staggering 45 hectares and there are some left over spaces in the middle dedicated for investors.

# WASHERA BUILDING

Office building design proposal with experimentation on natural lighting for a productive work environment

# KATAMPE REALESTATE

Realestate design in  
Nigeria, Abuja currently  
under construction
